NEMO

## Aquatic Surfactant

**Aquatic Surfactant for Addition to Products Approved  
for Use in Aquatic Situations**

### Technical Brief

**Active Ingredient:** 315 g/L Cocamidopropyl Betaine

**Formulation:** Soluble Concentrate (SL)

Registered for use in <b>Aquatic</b> Situations with <b>Aquatic</b> Weed Control approved <b>Glyphosate</b> products			
Nemo <sup>®</sup>	LI 700 <sup>1</sup> <sup>®</sup>	Agral <sup>2</sup> <sup>®</sup>	BS1000 <sup>3</sup> <sup>®</sup>
✓	X	X	X

### Benefits

- Nemo is the only stand-alone Aquatic approved Surfactant available in the market today
- Nemo gives you the assurance you are using an aquatic approved surfactant when also using an aquatic approved glyphosate or diquat product
- Ensures even and thorough coverage of plant foliage to increase herbicide absorption
- Allows the spray solution to evenly wet the most hairy, waxy or difficult to wet weed foliage
- To be used as an addition to glyphosate products approved for use in aquatic situations (i.e. Kermit<sup>®</sup> 360 Herbicide, Kermit<sup>®</sup> 510 Herbicide, Kermit<sup>®</sup> 700 Herbicide, Roundup<sup>®</sup> Biactive Herbicide by Monsanto, Nufarm Weedmaster<sup>®</sup> Duo Dual Salt Technology Herbicide, Erazo<sup>®</sup> 360 Bi-Aquatic Herbicide)
- To be used as an addition to diquat products approved for use in aquatic situations (i.e. Reglone<sup>®</sup> Non-Residual Herbicide)

## Situation

**Nemo Aquatic Surfactant** can be used for the addition to glyphosate and diquat products **approved for use in aquatic situations**, e.g.:

- glyphosate products – approved for use in aquatic situations  
(i.e. Kermit® 360 Herbicide, Kermit® 510 Herbicide, Kermit® 700 Herbicide, Roundup® Biactive Herbicide by Monsanto, Nufarm Weedmaster® Duo Dual Salt Technology Herbicide, Erazé® 360 Bi-Aquatic Herbicide)
- diquat products - approved for use in aquatic situations  
(i.e. Reglone® Non-Residual Herbicide)

Application Method	Rate	Critical Comments
Ground Boom	200 — 300 mL per 100 L	Use the higher rate on waxy, hairy or hard to wet leaf surfaces.
Handgun	50 — 70 mL per 100 L of spray solution	
Knapsack	7.5 — 10 mL per 15 L of spray solution	
Wiper Equipment and Controlled Droplet Applicators	1.3 mL per litre of spray solution	

Note: The above table represents only a modified extract from the full registered label. Always read the full product label before use.

## Mixing

Mix the glyphosate or diquat product with the total amount of water before adding the Nemo Aquatic Surfactant. Mix thoroughly. If Nemo Aquatic Surfactant is added during filling, foaming may occur.

## Application - Aquatic Areas

DO NOT apply this product when mixed with approved aquatic herbicides within 0.5 km up-stream of potable water intake in flowing water (i.e. river or stream, etc.) or within 0.5 km of a potable water intake in a standing body of water such as a lake, pond or reservoir.

Applications to moving bodies of water should be made while travelling upstream wherever possible to prevent concentration of this product in water. When making any bankside applications, DO NOT overspray more than 0.5 m into open water. Avoid spraying across moving bodies of water, or where weeds do not exist. When emerged infestations require treatment of the total surface area of impounded water, treating the area in strips may avoid sudden impact on habitat.

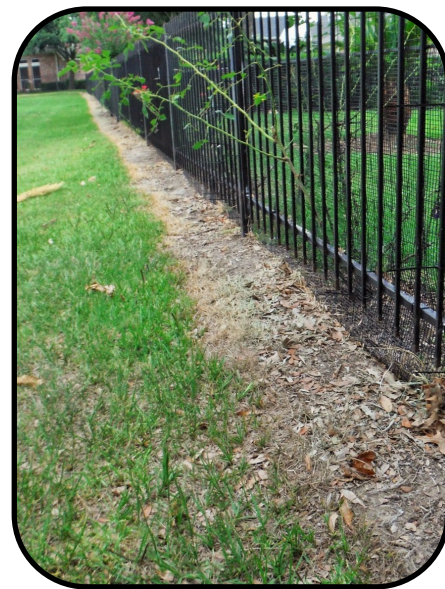

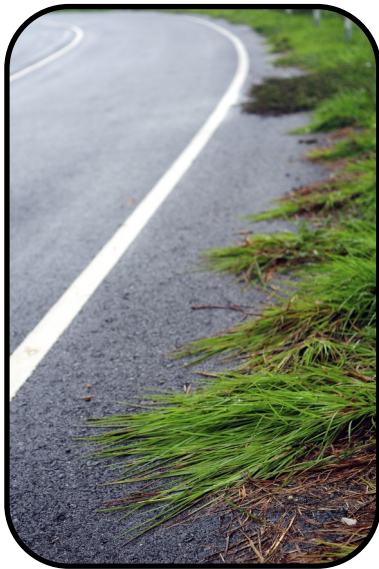

**Is your surfactant aquatic approved?**

## Packaging

Pack size: 2.5 L, 10 L

## Ideal for areas such as:

- Where an aquatic approved glyphosate or diquat is used :
  - Commercial, industrial, and public service areas
    - ⇒ Fence lines
    - ⇒ Edges of pathways etc.
    - ⇒ Roadsides (especially near gutters)
    - ⇒ Rights of way - access roads, driveways and paths
- Aquatic Weed Control
